50X1-HUM

1. Measure have recently been undertaken by Yugoslav authorities for the demolition of all the most important communications objectives in the event of a conflict. In order not to create panic among the population, the preparatory work has been initiated by civilian engineers and labor rather than by military units.
2. Demolition preparations have been completed on all the most important bridges, as also in the city of Zagreb where rooms have been wired; however, the explosive charges are not yet in the immediate vicinity of the objectives, which are currently under the surveillance of military and militia patrols.
3. Similar measures have been taken with respect to objectives along the frontier, with the only difference that here the explosive charges have already been placed and only the installation of the detonator is required to effect the demolition of the objective. All measures are in the so-called "third state of preparation".
